BUNDAY, MARCH, 4, 1900

CATTLEMEN'S CONGRESS TU-MOR-HOW.

The Gazette a short time ago, when commenting upon the intended appropriation of the public lands by the butchers and cattlemen, said that it might not be possible to defeat the plac of the cattlemen, and intimated that the railroad might be in the echeme, and if it was so that the Southern Pacific was in the job, it would go through anyway. We will not comment upon the admission by the Gazette of the power of that porporation at Washington, but will ear that the admission is not of the kind that will give to the people an assurance that will aid them to form a judgment in favor of giving a voting support to the party the corporation can so fully direct in legislation by controlling its action.

We do not believe there is any trath in the statement or suggestion of that paper. The Southern Pacific is controlled by whatever is for its interest in making the largest earnings possible from its property, and in that particular it does not differ from those who have made investments in other departments in trade.

When we have made a mental review of the fore and back grounds of the proposed approdriation of the public lands, we cannot ascertain a cause that would be likely to influence the action of that corporation to aid the steal. We do not believe the corporation would act in opposition to an Increase in its earnings through malicion meas to the people in the and west or that it would aid in the scheme against the people in Nevada, much as we have been given to understand from its action toward the State and its people that it dislikes both.

Corporations, like men, are controlled by interest, and for that gause any energine made by the co-poration against its interest is very far away to rest a judgment upon With the lands of the State leased to cartiemen, when could that corporation expect any increase in trade over its present cuttle business from a development within the State of the industries it is capable of sustaining?

The second coming of Christ would be a very proper time to fix for an increase in business, as He would surely kick the butchers and cattleme i out of position by the use of most very much like the gords used upon those who sold doves in the tample, whom he described as taleves.

Trese are some of the conocations tha we have arrived at, which leads us to say that the ratiroud is not in the eteal. Another forcible reason may be stated that will tend to convince the mind of the innocence of the corporation in the land steal, which is that railroads steal for themselves only,

We believe there is not anything wroug in extending sympathy to satin when he is in a bad place of in very bad company and when under like conditions it is commendable and proper to extend sympathy to the Southern Pacific and Charlie Wallace, should it be they are in the range appropriation robbery, but for reasons stated we do not understand upon what principle connected with a railroad the company could be identified with the disreputable proceeding.

Coarlie Wallace will do what is necessary to be done to aid a railroad, but our confidence in the man is such that be Kality o any direct inhumanity to the people such as there is included in the organized butchers and cattlemen's effort to impoverish the State by an appropriation to their own use of the public ranges.

Tomorrow the range appropriation mon will gather themselves together at San Francisco and resolve that the public ranges are not receiving the care they should receive from the sheep men.

Tost the ranges are now over pastured because of the many bands or sheep there are upon them and the many small herds of cattle there ar a that belong to the settlers in meny parts of the ranges that wander at large and graze the public lands to the great inconvenience of the organized. capitalized butchers and cattlemen who use the ranges for grazing their large herds.

That the organized butchers and cattlemen have large sums of money invested in herds of cattle that feed or right upon the public domain. Tost the eurnings of the large omitle interests that receive nurshment from the herbage and grasses on the ranges are largely deminished because of shee p respected resident of Dayton, died Friand small herds of cattle that fried day afternoon about 2 o'clock of upon them to the loss and deterrnent dropey. of capital belonging to large or pital ized interests invested in stoc'z that feed upon the grasses that grow upon

the ranges. That it is the sense of the cattlemen's mob and the duty of the rich man's congress is to exclude from the herds of the seathers by lessing the ranges at not more than one cent per acre to the organized, capitalized butchers and cattlemen who have large sums of money in stock that require all the feed that grows upon the public domain to the exclusion more especially of the few herds of sheep and small herds of cattle that belong to the poor settlers and sheepmen.

France and Russia May Be Drawn chiarged. Into War With England and Germany.

Special to the JOURNAL.

LONDON, March 4.-While the conduct of the British soldiers during the past week has been all that the most patriotic Englishman could desire, the political outlook has darkened and grave apprehension exists in quarters which possess actual knowledge of the impending dangers.

In a message to the premiers of the various British Colonies, Minister Chamberlain has stated:

It is necessary to use the present British forces elsewhere.

All eyes turn to vard the Indian frontier. The efforts of France and Russia to have the Sultan of Turkey re-open the Egyptian question having failed, it is now expected that Russia's armies will advance nearer to the Indian frontier. The situation is full of danger and the present Boer war may furnish an excuse that in a few weeks will plunge the nations of Europe into a war, the like of which the world has never

WASHINGTON, March 3.—There is a sensation in the charges as contained in a confidential letter received today at the Navy Department from American citizens and a former attache of the Department abroad.

The communication relates to the wrecking of the Cruiser Charleston and makes the serious statement that a number of officers of the vessel at the time of the disaster were under the influence of liquor. The charge is supported by quotations from men on board the cruiser at the time. The letter has been referred to the Judge Advocate-General of the Navy with instructions to investigate.
